EVERY BIKE
HAS A MISSION

EVERY BIKE HAS A MISSION

A full-page background image showing a cyclist in a red jacket and black shorts riding a mountain bike on a sandy dune. The cyclist is wearing a large black backpack and a helmet. The scene is captured at sunset or sunrise, with warm golden light and long shadows. The cyclist is in a dynamic pose, leaning forward as they ride. A dark, semi-transparent geometric shape is overlaid on the bottom left of the image, containing white text.

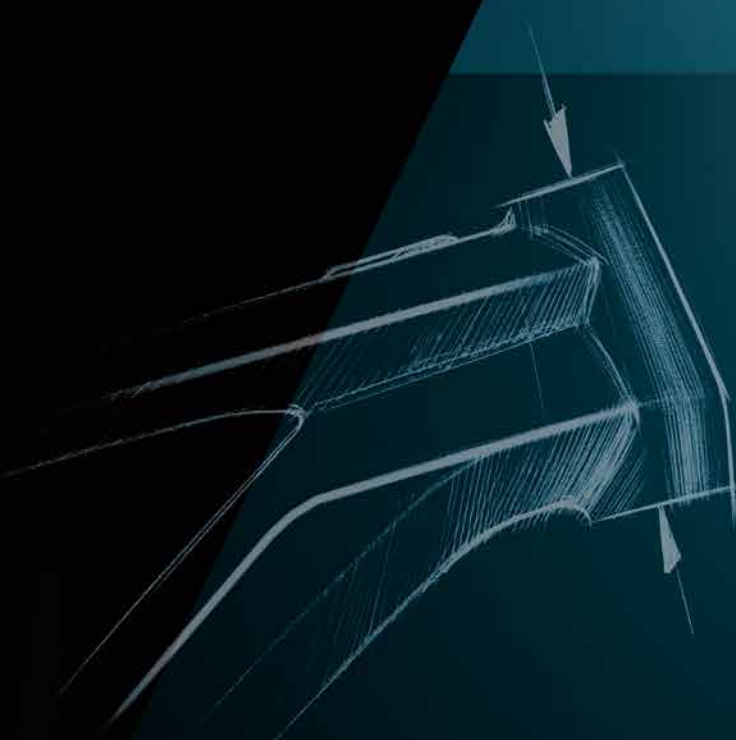

**WHEN DESIGNING AND DEVELOPING,
WE ARE NOT ONLY CREATING WELL
ENGINEERED AND UNIQUE BICYCLES,
WE ARE CREATING SOMETHING MORE...
SOMETHING WHICH GOES BEYOND JUST
JOINING THE MECHANICAL ELEMENTS
TOGETHER. AT KELLYS, WE BELIEVE THAT
EVERY BIKE HAS A MISSION TO FULFIL
IN EVERY HUMAN'S LIFE. WE MAKE OUR
BIKES IN THE SPIRIT OF THIS PHILOSOPHY,
TO BRING JOY TO THE LIVES OF MILLIONS
OF PEOPLE RIDING KELLYS AROUND THE
GLOBE FOR MORE THAN A QUARTER OF A
CENTURY.**

REVOLUTION IN

EVOLUTI

THE EVOLUTION OF E-BIKES WENT FROM ORDINARY BIKES WITH ADDED EARLY MOTORS AND HEAVY BATTERIES TO MORE INTEGRATED AND EFFICIENT SYSTEMS. FOR A NUMBERS OF YEARS, THE ENGINEERS HAVE BEEN STRUGGLING TO ADAPT THE READY-MADE DESIGNS FOR THE INSTALLATION OF ELECTRICAL SYSTEMS. IT NEVER BROUGHT SATISFACTORY RESULTS - THE BIKES WERE HEAVY, DIFFICULT TO RIDE, WHILE ENGINES WERE WEAK AND THE RANGE WAS RELATIVELY SMALL. THIS IS WHY KELLYS' ENGINEERS DECIDED TO GO BACK TO THE BEGINNING AND MAKE A REVOLUTION IN E-VOLUTION.

"After we decided to create our all-new e-bike platform, we wanted to start everything from scratch, to forget about what has been done before. We knew that to create new generation e-bike we need the new perspective and new way of thinking about the whole e-concept. That is why we focused on full integration, to make the whole structure solid, uniform and beautifully designed. No more external batteries, additional cables and poorly performing massive engines... That is not what e-bikes are all about."

ROMAN BOHACIK
The Head of R&D Department

"The first look at all-new frame reveals the beauty and solidity of its design. Sleek and dynamic lines, progressive geometry and the latest technologies create the one of its kind mountain e-bike - the e-bike of totally new generation."

VIT PESEK
R&D Engineer

"We wanted to create the e-bike with the top performance, handling and fun factor of the best non-electrified mountain bikes we have ever ridden. On the top of it, we put powerful drive unit with fully integrated battery to add an extra boost!"

PETER CERMAK
e-bike Product Manager

E-BIKES

ALL - NEW

KELLYS TYGON & TAYEN

KELLYS TYGON AND TAYEN ARE THE MOST ADVANCED AND WELL-ENGINEERED E-BIKES MADE SO FAR. BUILD FROM SCRATCH, THE NEW PLATFORM DOES NOT ACCEPT ANY COMPROMISES - IT WAS BUILT TO BE AN E-BIKE FROM TOP TO BOTTOM. UNIQUE RIDING CHARACTERISTICS ALONG WITH FULLY INTEGRATED 630WH/17AH BATTERY AND EFFICIENT SHIMANO DRIVE UNIT ALLOW NEW TYGON AND TAYEN TO BRING THE RIDER TO THE ABSOLUTELY NEW LEVEL OF E-BIKING.

UNI-BODY INTEGRATED DESIGN:

This is what distinguishes Kellys' new e-bikes from the other known designs. As in F1 racing cars, this unique way of design is based on monolithic, unified body of the bike creating a lightweight and extra-stiff structure for the best possible performance. By following the Uni-Body Integrated Design philosophy, our engineers were able to develop e-bike with the extremely high stiffness-to-weight ratio, with fully integrated components and undisturbed, uniform and durable construction.

KELLYS E-FRAME:

The new frame combines progressive geometry with fully integrated battery to keep the riding characteristics at the level unavailable for other e-bikes on the market. Short chain stays, expanded front triangle along with a low gravity centre ensures flawless cornering, stability and control. All the latest MTB frame technologies were also applied to provide the best mountain bike experience possible.

KELLYS RE-CHARGE LI-ION BATTERY:

The power source of new TYGON and TAYEN uses the latest technologies available - it's compact, lightweight and has an unparalleled volume-to-capacity ratio. This is why our engineers were able to pack massive 630Wh/17Ah of energy into small, fully integrated power cell hidden in the frame. Thanks to its compactness the bottom tube of the frame, where the battery is placed, is single-wall, narrow and has an undisrupted structure which makes it stiffer and lighter in comparison to the other designs.

SMART GEOMETRY:

With the new frame came a new approach to the sizing and geometry. To keep the optimum riding characteristics and ensure flawless and comfortable ride our engineers designed the geometry for each frame's size separately. Thanks to smart geometry every rider can be sure of the best and optimum performance regardless of the size of the frame.

DRIVE CORE:

It's a design used in our latest full-suspension bikes, and as in our NOID or SWAG, the Drive Core is also a heart of Kellys' new e-bike frame. It's a solid structure built around the drive unit and bottom bracket. It is not only holding the motor but also strengthen the whole structure of the frame bearing all the loads occurring during aggressive riding. The rigidity is the key factor of this design ensuring efficient power transfer, ultimate performance and extreme lateral stiffness so desirable by mountain bikers.

The unlimited TRAILS OF MOROCCO

THE STORY BEHIND THE BICYCLE

AS A RIDER, YOU HAVE ALREADY
SEEN A LOT OF STUNNING VIEWS,
FELT ADRENALINE IN YOUR VEINS
MANY TIMES, AND YOU HAVE
ENJOYED A BUNCH OF AMAZING
SUNSETS WATCHING FROM YOUR
SEAT FOR SURE. BUT THERE ARE
ALWAYS SOME NEW PLACES
WAITING TO BE EXPLORED.

After 2-hour drive from Marrakech, we
reached our destination on the High
Atlas Mountains. Our team was super
excited to jump on the bikes and start an
extraordinary journey together. The road
was ours. Let's set the wheels in motion!

The rocky trails were twisting and leading us across the rural countryside of Morocco. During all the way up the valley, we have been surrounded by stunning landscape, which constantly powered us to go further.

In the hearth of the Toubkal National Park, we discovered an authentic Berber village, called Ait Souka. The local kids welcomed us with a big smile, positive energy, and they were all incredibly spontaneous. Those great moments spending with our new little friends taught us, what the true meaning of freedom represents. Isn't it what we're all searching for?

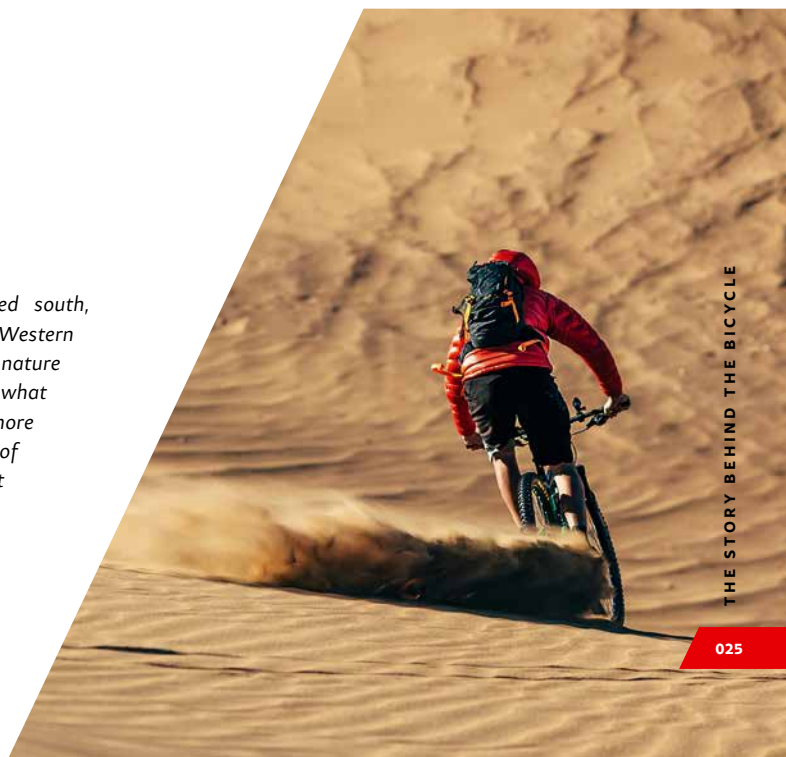

Following the planned route, we reached Imlil, a small traditional village situated 1,800 m above sea level. Our group paused, pleasuring in the beauty of this extraordinary place. That observation has delighted us with a strong feeling of satisfaction. But after the all-day ride across a few rough sections, we felt also tired and weak. Therefore we highly appreciated a hospitality of the residents at the end of the amazing day.

A typical Moroccan street food, served with the cup of legendary mint tea, were the best rewards afterward. Delicious!

The last day we headed south, in a direction to the Western Desert. A character of the nature was constantly changing, what made a whole picture even more memorable. The uniqueness of this country is that you can start your ride on the top of the Atlas Mountains and at the same day you are leaving your tracks in the dunes range.

DOWN HILL

THE RIDERS FOR LIFE

THE STORY BEHIND THE BICYCLE

REACHING FOR THE TROPHIES TAKES LOTS OF
COMMITMENT, DEDICATION AND HARD WORK.
THE MORE YOU WANT TO GET, THE MORE YOU
NEED TO GIVE. THIS IS WHAT BEING AN ATHLETE
IS ALL ABOUT.

"I do not know people and riders who spend more time, energy and passion than our boys do."

MICHAL WIESENGANGER
Kellys Factory Team
Manager

Kellys Factory Team is an extremely important element of the Kellys brand - it emphasises almost 25 years of Kellys sporting legacy and traditions. Since 2015 our riders compete both on European and world MTB stage with dozens of races completed, with European and World Downhill Championship, European and World Cup and many national championships and cups among them.

These ambitious riders cultivate Kellys' tradition giving their best to reach their top results. That is why Kellys is proud to support them receiving in return the biggest commitment and the most sincere passion these young talents can give.

Our riders devote their whole lives to sports and cycling, which is strongly inspiring for us, for the whole Kellys brand and also for KFT Supporters and Fans. By supporting young talented athletes, Kellys become a significant part of the cycling world and also verify Kellys bicycles' racing capabilities which helps us to provide you, riders around the globe, with the best bikes to fulfil their mission flawlessly.

RASSTO BARANEK
Kellys Factory Team

"When Kellys introduced new NOID and it became our official racing bike, I was really thrilled to try out new different setups. New frame's Vario Geometry System has pushed geometry tuning possibilities to absolutely new level. Together with our team manager and Kellys' R&D department we decided to test 29-inch wheel setup. For me it was absolutely unique experience. When riding big wheels I instantly become faster and gained a lot of confidence - it was like jumping up to the higher league! This is why for 2019 season Kellys decided to introduce 29-inch Kellys NOID with specially tuned geometry! From now on every rider can feel what I felt when riding new Kellys NOID 29" for the first time."

THE FEAR SHREDDER

KELLYS NOID

DESPITE THE FACT THAT THE PREMIERE OF THIS DOWNHILL BEAST TOOK PLACE ONLY A YEAR AGO, NEW KELLYS NOID HAS ALREADY GAINED GREAT RECOGNITION AND RESPECT AMONG EXTREME RIDERS AROUND THE WORLD. NOT ONLY THE UNIQUE DESIGN AND BEASTY LOOK, BUT ALSO INNOVATIVE TECHNICAL SOLUTIONS DISTINGUISH IT FROM THE OTHER DH BIKES AVAILABLE TODAY.

Kellys NOID is just one of its kind allowing the riders to reach absolutely new level of riding. Being the racing bike of Kellys Factory Team, Kellys NOID confirmed its sport potential, durability and performance. Thanks to unique Kellys' Think Link Suspension System and Vario Geometry System, the NOID proved to be a versatile bike allowing to obtain the best results whatever the conditions, the type of track or rider preferences.

For season 2019 Kellys engineers went even further. Thanks to their cooperation with Kellys Factory team during the 2018 racing season the new Kellys NOID twentyner has been born. From now on every rider has a freedom to choose preferred wheel size while profit the highest performance of Kellys NOID platform.

MOUNTAIN

ENDURO

**RE-THINK
THE PERFORMANCE**

THINK LINK

S U S P E N S I O N S Y S T E M

THINK LINK SUSPENSION SYSTEM IS A UNIQUE DESIGN OF TOTALLY INDEPENDENT REAR SUSPENSION. IT ENSURES NO NEGATIVE INFLUENCE FROM A DRIVETRAIN AND BRAKES, NO PEDAL KICKBACK AND CONSTANT REAR TRIANGLE GEOMETRY WITH ABSOLUTELY NO CHAIN GROWTH.

"Think Link Suspension System proved to be well-engineered and high-performing platform. This is why we wanted also trail and all-mountain riders to benefit from its unique characteristics. Thanks to tuned geometry and suspension we created all-new line of versatile, swift and robust trail bikes which can go far beyond the riding experience know to the mountain riders so far. Just choose your favourite wheel size, hit the trail and become the king of a mountain!"

ROMAN BOHACIK
The Head of R&D Department

THINK LINK SUSPENSION KEEPS THE GRIP AT THE BEST POSSIBLE LEVEL AND PROVIDES SMOOTH STROKE ALLOWING UNINTERRUPTED POWER TRANSFER FROM A CRANK TO THE REAR WHEEL. IT COMES DOWN TO THE FACT THAT THE SUSPENSION WORKS INDEPENDENTLY BEING ACTIVE IN ANY SITUATION UTILISING THE FULL POTENTIAL OF THE BIKE AND THE RIDER ANYTIME ANYWHERE.

THINKLINK™
SUSPENSION SYSTEM

Utilised in new Kellys NOID and SWAG the Think Link Suspension System proved to be not only high-performance platform but also durable and versatile solution for enduro riders. No matter if you are racing or shredding in a bikepark during the weekend.

For 2019 season Kellys' engineers decided to go further and implement Think Link Suspension System along with other unique SWAG's technologies to the trail bike - the all-new Kellys THORX. Thank to re-tuned suspension, trail-optimised geometry and carefully chosen components, all trail riders from now on benefit can from the best suspension platform created by Kellys ever. But that's not all! We're giving all riders the freedom to choose their favourite wheel size - all-new Kellys THORX is available with both 27.5- and 29-inch wheels.

MOUNTAIN

TRAIL

Trip to THE ROOF OF THE WORLD

THE STORY BEHIND THE BICYCLE

THE HIMALAYAS, A.K.A. THE ROOF OF THE WORLD, IS THE PLACE WHERE THE GROUND PIERCES THE SKY, THE PLACE WHERE EVERYTHING LEFT BELOW LOSES ITS HITHERTO MEANING, THE PLACE WHERE YOU CAN GO FAR BEYOND YOUR EGO... WE TOOK OUR BIKES TO GET THERE, TO EXPERIENCE THE RIDE OF OUR LIFETIME.

Crowded Kathmandu is a crucible of religion and culture. On the first day of the expedition, we looked out over the city from the hill of Swayambhunath Temple. There are 365 stairs leading to it, and at the central point, a huge stupa is standing, which, with the eyes of the Buddha, looks at the four sides of the world.

Fully packed
 Kellys Gibon had a not easy mission to complete

Nepal's distinctive sign - rope bridges connecting the banks of the rushing rivers and streams. Some hung really high, which meant for us a megadose of adrenaline.

Nepal is one of the poorest countries in the world. At the same time, the Nepalese are one of the most sympathetic and positive people in the world. The rites that take place in the streets and at the temples are hypnotising. Worth to stop here and see, feel the magic of this place.

4000 meters above the sea level - from this height the beginner paratroopers jump. And we're going down and bite into the slope on our bicycles.

Technology Library on pages 168-169.

"All-new HACKER was created using Kellys' years of experience in production of high-performance XC racing bikes. Our race-proven iCAD carbon combined with unique frame design will move every rider to a level of the uncompromising performance."

MICHAL GABOR
XC Bicycles Product Manager

ALL-NEW

KELLYS HACKER

KELLYS CROSS-COUNTRY LEGACY CONTAINS OF MANY SUCCESSFUL RACING BIKES GEARED FOR THE TOP PERFORMANCE. BEST MATERIALS, LATEST TECHNOLOGIES AND UNIQUE KELLYS' DESIGN HAS RESULTED IN CREATION OF RACE-PROVEN CARBON HARDTAILS WITH UNIQUE RIDE CHARACTERISTICS, LOW MASS AND UNCOMPROMISED PEDAL EFFICIENCY.

For the upcoming season Kellys is presenting the awaited carbon XC racing machine - all-new HACKER. 29-inch wheels, lightweight frame with racing geometry and performance along with top-notch components allow new HACKER to satisfy the most demanding riders.

Being the ultimate XC racer, the new HACKER's frame combines iCAD carbon fibre of the military grade and latest standards to be compatible with the most advanced racing components. All-new HACKER is fully Di2 ready with inner wiring, direct derailleur and brake callipers mounts, and also front and rear thru axles with tapered head tube for razor-sharp handling and an excellent stiffness. To ensure flawless and effective power transfer Kellys' engineers implemented the Power Core high-efficiency design to the new HACKER's frame. It is based on combining material characteristics with specific shape to create strong and uniform structure connecting head tube, bottom bracket and rear stays while maintaining low weight. The shortened rear triangle with flex seat stays for unprecedented manoeuvrability in tight corners significantly improves ultra-efficient power transfer from the crank to the rear wheel and also damps the vibration to increase comfort. Expansion of the front triangle allows to increase the wheelbase for the best stability at high speeds and on the steepest descents.

HUGO ROBENEK
Kellys Factory Team

"With all-new WHIP it's really simple. Just think what you want to do and just do it. It's really comfortable when you want to go over your limits and you're sure that you can rely on your bike. It's crucial factor when ride the extreme - to feel confident and become unstoppable. This is what new WHIP gives me every ride - and I love it!"

ALL - NEW

KELLYS WHIP

FOR THE DIRT RIDERS EVERY RIDE BRINGS SOMETHING NEW - IT'S ALL ABOUT GOING FURTHER, OVERCOMING FEAR AND LAWS OF PHYSICS, RIDING BEYOND. THE DIRT BIKE NEEDS TO BE TOUGH, ROBUST AND READY TO GO OVER THE LIMITS WHENEVER THE RIDERS WANTS.

This is why Kellys created new WHIP - the toughest bike for the toughest riders. There is no compromises whenever it comes to the frame's performance and strength. The new WHIP is stronger and easier to control - both on the ground and in the air, so every dirt rider can feel limited only by his imagination. The new frame's geometry provides lots of fun factor, because we know that the dirt riding is all about fun!

MISSION:

THE CITY CRUISER

Life of **BALLET DANCERS**

THE STORY BEHIND THE BICYCLE

INTENSIVE, VIVID AND VIBRANT – LIVING IN THE CITY IS SOMETHING ABSOLUTELY UNIQUE BUT RIDING A BIKE ALONG RAPID CHANGING SURROUNDINGS, STREETS FULL OF LIVE, BEAUTIFUL ARCHITECTURE AND WONDERFUL PEOPLE IS ONE OF ITS KIND EXPERIENCE. THIS IS THE REMARKABLE STORY OF BALLERINAS OF SLOVAK NATIONAL BALLET RIDING THEIR STYLISH BICYCLES WITHIN THE PULSE OF BEATING HEART OF BRATISLAVA - THE CAPITOL CITY OF SLOVAKIA.

*Every ride
is a wonderful
journey.*

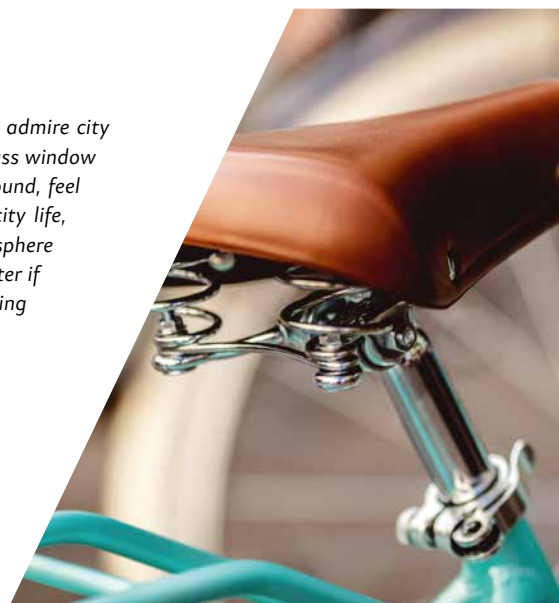

Life of a ballet dancer is full of commitment and passion. Hours of hard training, many sacrifices but also a unique feeling of real art, beauty and music. They say that riding a bicycle is like dancing - you are using your physical skills, but also you need to keep your balance, ride smooth with grace and charm...

Girls just love to ride their bikes across the city streets and alleys, especially that some of them are closed to car traffic. With their bikes they can feel free and independent to stay on moving forward, to ride leisurely every day.

While riding a bike, you can admire city life better than behind the glass window of a car. You can hear every sound, feel every aroma, be a part of the city life, immerse yourself in city atmosphere every time you ride. It does not matter if you ride to work, school or just spending free time riding around.

Stylish city bicycles derive their beautiful form from Holland classic bicycles - the country of one of the richest and oldest cycling culture in Europe. The unique style is merged with utility and unparalleled comfort to let you experience unrepeatable ride every day.

JUNIOR

FIRST BIKE

KITE 12 RACE
RED

KITE 12 RACE

Stylish balance bike Kellys KITE 12 helps your child to get used to riding a bike. Children naturally learn to keep their balance without the fear of falling. Riding on a balance bike is a lot of fun. It teaches your child to ride on two wheels, helps to improve their motor skills, riding control and coordination. The best riders have the opportunity to keep their feet on the integrated foot pegs and develop advanced riding skills. Adjustable handlebars and quick-clamps on seat allow easy customization for each child. Ease of riding is ensured by inflatable 12 inch wheels with denser tread which improve grip on variety of terrains, be it grass, mud or pavement. Balance bike Kellys KITE12 meets the highest safety standards for the European market and is certified to EN-71 norm.

TECHNOLOGIES

 WHEEL SWAP	The unique ability of the frame to utilise both 29-inch or 27.5+ wheels .
 BOOST THRU AXLE	Boost thru axles increases the stiffness even more, resulting in more effective and more precise bike handling . Thanks to the wider rear hub the wheels are stiffer, the tyre clearance is bigger , and so the wider rear wheel and shorter chainstay can be applied.
 Di2 COMPATIBLE	The frame is electronic shifting Shimano Di2 system ready .
 DRIVE CORE	Drive Core bottom bracket is the heart of Kellys' new generation frames. Thanks to its tough structure it can withstand the great loads occurring during aggressive ride both from suspension system and drivetrain.
 FLAT MOUNT	Flat mount standard is based on the same principles as post mount, but it is intended for road bikes allowing to use smaller 140-millimetre rotors .
 FOUR BAR LINKAGE SUSPENSION SYSTEM	The advanced system of the rear suspension characterized by high sensitivity and pedalling efficiency . Versatile characteristics ensures the best damping and riding performance regardless of the condition.
 HYDRO FORMING	Hydroforming is a way of the 3-D shaping of the frame tubes. This technology allows creating lighter, stiffer and more beautiful frames thanks shape-to-strength optimization.
 INTEGRATED FRAME PROTECTION	Integrated Frame Protection ensures the best possible frame protection. Its exclusive design, precise fitment and durability make the rider feel confident to hit the toughest parts of the trail without any fear of damaging the frame.
 INTERNAL CABLEROUTING	The derailleur, brake, dropper and electrical cables are routed internally inside of the frame which results in a cleaner design, better performance and durability .
 ISCG05	It is a chain guide, bash guard or front derailleur direct mount standard. It is widely used in extreme mountain bikes.
 KELLYS RE-CHARGE LI-ION INTEGRATED BATTERY	This unique power source is compact, lightweight and has unparalleled volume-to-capacity ratio . This is why our engineers were able to pack massive 630Wh/17Ah of energy into small, fully integrated power cell hidden in the frame . Thanks to its compactness the bottom tube of the frame, where the battery is placed, is single-wall, narrow and has uninterrupted structure which makes it stiffer and lighter in compare to the other designs.

KICKSTAND DIRECTMOUNT

This feature allows to **directly mount the kickstand to the frame** without unnecessary intermediary parts like additional brackets or clamps. It's **lighter, simpler and more durable**.

POST MOUNT

It is the way of the direct mount of the brake calliper which results in stiffer and more precise connection to the frame, thus **better braking performance and durability** is provided.

POWER CORE

Power Core design is the way of **weight-to-stiffness frame optimization** which bases on reinforced structure connecting head tube, bottom bracket and chainstays to ensure **virtually lossless power transfer, razor-sharp handling and low weight**.

PRESS FIT BOTTOM BRACKET

This technology allows putting bottom bracket bearings directly into the frame, which results in **lighter, stiffer and more durable system**. Bigger diameter of the bottom bracket tube also creates **tougher frame structure**.

SIDE SWING

New standard for front derailleurs. Thanks to simplified construction it allows to **shorten the chainstays**, provides **better shifting performance** and **more tyre clearance**.

TAPERED HEADTUBE

The tapered head tube serves up a significant **increase in rough terrain tracking and stability** by use of oversized 1.5" bottom bearing.

THINKLINK SUSPENSION SYSTEM

Think Link Suspension System is a **unique design of totally independent rear suspension**. It ensures **no negative influence from a drivetrain and brakes, no pedal kickback and constant rear triangle geometry** with absolutely **no chain growth**. Think Link Suspension keeps the grip at the best possible level and provides smooth stroke allowing uninterrupted power transfer from a crank to the rear wheel.

THRU AXLE

Thru axle is really important feature of the frame **increasing the stiffness of the whole structure, better braking and pedalling performance**. It also results in improved steering and handling, especially at high speeds and rough terrain.

UNI-BODY INTEGRATED DESIGN

As in F1 racing cars this unique way of design is based on monolith, unified body of the e-bike creating lightweight and extra-stiff structure for the best possible performance. Having **extremely high stiffness-to-weight ratio**, with fully integrated components and undisturbed, uniform construction it ensures the **best possible performance**.

VARIO GEOMETRY SYSTEM

VGS is a unique feature of new NOID's allowing **fine tuning of the frame geometry** to match bike's characteristics to the riders needs. The chainstays and wheelbase length, bottom bracket height along with the head and seat tube angles can be adjusted within minutes.

KELLYS LADYCONCEPT

Kellys Lady Concept stands for unique approach to the design of frames. KLS mark means **specially adapted geometry and sizing to meet the feminine bikers needs**. Also the gearing, suspension and, of course, the unique style are taken into account.
